

CWP - CHRONOS WORKFLOW PLATFORM

CHRONOS
systems

A Comprehensive, Self-Service Workflow Platform

Businesses of all size can realize significant savings simply by incorporating business process automation tools into their IT systems. Implementing workflows in order to automate any business processes or digitize previously paper-based activities can be expensive, time consuming and programming labor intensive using traditional software tools.

Chronos Systems has developed the Chronos Workflow Platform (CWP), a flexible but powerful and highly user friendly solution that can help you cut workflow implementation time by 50-70 percent compared to custom development projects or other tools currently on the market. The CWP enables users to create workflows without major programming/technical input.

This workflow building tool has already helped streamline and digitize front and back office business processes of several Fortune 500 corporations in Europe and USA. The CWP is accessible via browser and requires no installation on desktop level. It can be implemented on MS, Linux, Domino, Websphere or Java environments.

UNIQUE FEATURES

- Ready to use, off-the-shelf product.
- Can handle complex workflows, parallel processes and external interfaces.
- Ability to implement workflows and quickly digitize processes **without the extensive involvement of programming resources.**
- Any type or kind of workflow can be implemented regardless of business area, i.e. CRM, Finance, HR, R&D, Marketing, Administrative, Manufacturing, Product Development.
- **The cost of this platform is very competitive, equals that of a single custom development project.**
- Maintenance is simple and highly cost efficient.
- **Workflow implementation cycle time can be reduced dramatically – on average .by 50-70 %.**
- By using this tool, a lot of 'small' workflows that otherwise would not be digitized, can be implemented.

One of the most unique features of CWP is that business process owners can manage the forms themselves without a need to do any programming. The process definition as well as the forms can be set by the administration documents.

The Chronos Workflow Platform creates a framework with identical front-ends and customizable forms and processes at the same time so you can create any particular workflow you like. This is regardless of the size or complexity of the process.

KEY TECHNICAL FEATURES

- Graphical workflow design tool
- XML based process description
- XML based interfaces to other process management systems like QPR ProcessGuide or ARIS Process Platform.
- Document based process administration tool.
- Multilevel notification sending system.
- External database access.
- Security
- Activity logs and history with statistics

OPERATIONAL ENVIRONMENT

CWP	1	2	3	4	5
Application Server	Lotus Domino R5.06-12 and R6	Windows 2000 or Windows 2003	Bea WebLogic 8.1	WebSphere Application Server 5	Apache Tomcat 5.x
Web Server	Domino HTTP	MS IIS 5.0 or 6.0	Bea WebLogic 8.1	IBM HTTP server 1.3.26 or Apache Web server 2.0	Apache Tomcat 5.x
Database Server		Oracle 8i or Oracle 9i or SQL Server 7.0or SQL Server 2000 or MSDE	Oracle 8i or Oracle 9i	Oracle 8i or Oracle 9i or SQL Server 7.0 or SQL Server 2000 or MSDE	MySQL 4.0 or Oracle 8i or Oracle 9i
Workflow Engine	Agent based	Service based	Service based	Service based	Daemon (background process)
Browser	IE 5.5 , 6.0	IE 5.5, 6.0	IE 5.5, 6.0	IE 5.5, 6.0	IE 5.5, 6.0
Notification sending	Lotus Notes	SMTP	SMTP	SMTP	SMTP
